

ATLANTIC RESOURCE CORPORATION

*In 2002, Brandenburg was retained by Brown and Caldwell for the decontamination, remediation, and demolition of the USEPA Region 2 Superfund site.*

**OWNER**

Potentially Responsible Parties

**LOCATION**

Sayreville NJ

**FACILITY TYPE**

Precious metal recycling facility

**PROJECT BACKGROUND**

Atlantic Resource Corporation was a former precious metal recycling facility listed on the National Priorities List under CERCLA (Superfund). In 2002, Brandenburg was retained by Brown and Caldwell, an environmental engineering firm representing a group of potentially responsible parties for the decontamination, remediation, and demolition of the USEPA Region 2 Superfund site, located in Sayreville NJ.

**SCOPE OF WORK**

- Construct an access road, field office, and decontamination zone
- Remove, package, load, and dispose of all asbestos containing waste material
- Decontaminate and remove eight recycling furnaces
- Perform all necessary sampling, testing, and disposal of suspect material
- Dismantle above ground tanks and associated piping
- Demolish several 2-story brick buildings to floor slab
- Perform underground tank excavation, removal, and disposal
- Remove other miscellaneous structures and perform site work
- Prepare all necessary permits
- Prepare and submit all necessary reports to EPA representative
- Remove, segregate, package, and dispose of all waste streams
