Medical attention and special

treatment:

Treat symptomatically.

# Section 5. Fire fighting measures

**Suitable extinguishing media:** Foam, dry chemical or carbon dioxide.

Water Fog

Decomposition products in case of

fire:

Thermal decomposition can lead to release of irritating gases and vapors.

Irritating organic vapours.

Phosgene.

Hydrogen chloride. Oxides of carbon.

Particular danger in case of fire: WARNING FLAMMABLE!

Vapours may accumulate in low or confined areas, travel considerable distance to source

of ignition, and flash back. Explosive rupture is possible.

Special protective equipment for

fire-fighters:

Fire fighters should wear positive pressure self-contained breathing apparatus (SCBA).

Wear full protective clothing.

Additional fire fighting advice: In case of fire, keep containers cool with water spray.

#### Section 6. Accidental release measures

**Personal precautions:** Avoid contact with skin and eyes.

Wear impervious gloves and chemical splash goggles.

Avoid inhalation of vapor, fumes, dust and/or mist from the spilled material.

See advice in section 8

**Environmental precautions:** Do not empty into drains / surface water / ground water.

**Clean-up methods:** Wear appropriate personal protective equipment.

Ventilate area.

Eliminate all sources of ignition or flammables that may come into contact with a spill of

this material.

Absorb the spilled material with an inert absorbent (nonflammable) material.

Store in a closed container until ready for disposal.

**Precautions for safe handling:** Keep away from heat, spark and flame.

Ensure adequate ventilation.

Wear suitable protective clothing, safety glasses and gloves.

**Conditions for safe storage:** Do not store or use near heat, spark, open flame or other sources of ignition.

Do not puncture, incinerate, or expose to temperatures above 48.9 °C (120 °F).

Store in a cool, dry place.

# Section 8. Exposure controls / personal protection

#### National exposure standards:

**Eye protection:** For eye protection, use tightly fitted safety goggles and a face-shield

**Skin protection:** Wear protective equipment.

The use of polyvinyl alcohol (PVA) gloves is recommended.

Protective clothing that covers arms and legs.

Please note that in practice the working life of chemical resistant gloves may be considerably reduced as a result of many influencing factors (e.g. temperature). Suitable risk assessment should be carried out by the end user. If signs of wear and tear are noticed

then the gloves should be replaced.

**Respiratory protection:** If inhalation risk exists, wear a respirator or air supplied mask complying with the

requirements of AS/NZS 1715 and AS/NZS 1716.
